Fidelity American Bankshares Show Gain

LYNCHBURG, OCT. 17 - Fidelity American Bankshares, Inc. has reported a slight gain in net operating earnings for the third quarter. The Lynchburg-based bank holding company said that net income for the quarter ending Sept. 30 was $997,542, or 38 cents per share as compared to $988,382 or 36 cents per share last year.

Income before security gains and losses was $994,516 or 38 cents per share, compared with $966,677 or 37 cents per share in 1974.

For the first nine months, net income was $3.3 million or $1.27 cents per share over $3.1 million or $1.17 cents per share last year, a gain of 8.5%.

A. R. Clements, President and Chief Executive Officer of F.A.B. said that in view of current economic conditions, management has deemed it prudent to maintain loan loss reserves well above those of 1974. Year to date, F.A.B. loan loss reserves are 170% over those of the same period last year. Clements stated that these increased reserves for loan losses are reflected in the earnings statement and that he is encouraged that earnings have shown an increase in spite of the significantly higher loan loss reserves.

Third quarter average deposits were reported at $675.1 millin, up from $665.0 million last year. Average loans dropped from $497.4 million for the third quarter in 1974 to $472.6 million in 1975.

Total average assets were $789.4 million for the third quarter of 1975, down from average assets of $797.3 million last year.
